

Registration at Horizon School

Horizon School is a school of support for Chinook's Edge School Division schools. The primary goal is that students are supported in their community schools using an inclusive approach.

Each of our schools offers programming to support diverse learning needs, and has the support of our Division Office Student Services team to develop programming. Students who are directed to Horizon have received extensive programming and support in a community school, and still have areas of programming that the Division Office Student Services team identify are not possible to meet within the community school setting.

Your first step would be to register at the CESD school in the community where you reside. We also recommend reaching out to the school after you have completed the online registration to identify the individualized programming supports that they have received previously so that the school can begin to consider their programming.
